

Anoscopy

Information and care after an anoscopy.

After the examination

Anoscopy is a simple examination that does not usually cause complications. You may have some discomfort from insertion of the anoscope, but it should pass quickly.

If an instrumental treatment was performed during anoscopy, such as haemorrhoid treatment, drainage of a thrombosed haemorrhoid, or fistula treatment, watch for the signs below.

Signs and symptoms of complications

- Heavy bleeding.
- Persistent anal pain.
- Fever.
- Local infection: pain, redness, and/or yellow discharge around the anus.

Diet and medication

Follow the medical instructions for any diet and medication prescribed to you.

Contact details

If you notice anything unusual after the examination, contact the Special Examinations Unit on 967 776 921 or 210 025 255/0 on working days between 08:00 and 20:00. You should also contact your attending doctor or go to an emergency department.
